Professional Summary

Computer Science and Engineering student at KTH seeking [...]. Strong foundation in software development and systems programming, with proven skills in collaboration, project management, and delivering client-validated software projects. Eager to contribute in a [...].

EDUCATION

KTH Royal Institute of Technology

Stockholm, Sweden

Master's of Science, Computer Science and Engineering

Aug 2024 — May 2029

- Relevant Coursework: Algorithms and Data Structures, Software Engineering in Project Form, Linear Algebra, Discrete Mathematics, Multivariable & Single Variable Calculus, Probability Theory and Statistics with Application to Machine Learning

Österängsgymnasiet

Kristianstad, Sweden

Gymnasieexamen

Aug 2021 — May 2024

WORK EXPERIENCE

Operator Blender

May 2025 — Aug 2026

The Absolut Company

Åhus, Sweden

- Independently managed facility-wide blending operations, ensuring continuous, high-volume supply across multiple production lines.
- Directed supply chain logistics and monitored critical factory infrastructure to eliminate downtime and maintain strict regulatory compliance.
- Performed preventative maintenance and partnered with automation and mechanical engineers to troubleshoot and resolve complex system failures.

Operator Bottling

May 2024 — Aug 2025

The Absolut Company

Åhus, Sweden

- Monitored and maintained bottle-filling production lines, diagnosed technical issues, and resolved mechanical equipment malfunctions.

PROJECTS

Scrum Master & Developer, MetroPed

Dec 2025 — May 2026

Led a team of 6 developers using Agile/Scrum to deliver a client-validated MVP ahead of schedule while managing sprints and risk pipelines. Engineered a custom Impostor Rendering System in Unity and C#. Formulated a robust Git workflow and comprehensive documentation to ensure scalability and a seamless stakeholder handover.

Developer, Bomberman

Nov 2025 — Dec 2025

Awarded “Best Project” in the IS1500 Computer Organization and Components course for developing a Bomberman replica on an FPGA board with a 32-bit RISC-V architecture. Programmed low-level system logic using a hybrid of C and RISC-V Assembly.

SKILLS

- **Programming Languages:** Python, Java, C, C#, SQL, PHP, MATLAB, RISC-V Assembly
- **Tools & Technologies:** Unity, Git, Docker, Agile/Scrum
- **Spoken Languages:** Swedish (Native), English (Fluent)
- **Licenses:** Swedish Driver's License (Körkort B)
